Letter of recommendation

To Whom It May Concern,

I have had an immense pleasure of having as a student working on his final thesis in my laboratory for approximately two semesters. During this time, Filip has demonstrated strong dedication to our cause and willingness to work hard. He was able to complete the outlined work successfully with an upstanding approach.

The research project performed at our workplace comprises precise and accurate work and requires responsible approach with an attention to details. In addition, it is considerably time demanding. Filip has proven himself to be an apt student and a patient person. He was able to understand different techniques and concepts very quickly.

Students are required to carry out their own search before they start the experimental part in order to better understand the problematic. Filip has shown himself as very initiative and curious person in learning about new issues. He is not afraid to ask questions in order to learn and improve his knowledge.

Overall, I sincerely recommend Filip Streško for admission to Medical Biotechnology MSc. programme at Aalborg University in Denmark. Please feel free to contact me with any further questions at zbytovsj@vscht.cz.
